Clean Energy Partnership shortlisted for 2010 Clean Tech Media Award

Berlin, 23 Jul 2010. The Clean Energy Partnership (CEP) is a nominee for the Clean Tech Media Award 2010 in the Mobility category. This is the third time the Clean Tech Media Award jury has selected pioneers of environmental technology, of whom the best will receive an award on September 16th, 2010.

The CEP is one of 15 candidates shortlisted from a total of 63 applicants for the Clean Tech Media Award. This year's prizes will be awarded in the following categories: Energy, Communication, Mobility, Lifestyle and Young Scientist. The CEP is up against two others in the Mobility category. An independent jury will decide who wins on 16 September.

The CEP was founded in 2002 with the aim of demonstrating hydrogen's suitability for daily use as a fuel in vehicles and to test the infrastructure for refuelling the vehicles. Berliner Verkehrsbetriebe BVG, BMW, Daimler, Ford, GM/Opel, Hamburger Hochbahn, Linde, Shell, Statoil, Total, Toyota, Vattenfall Europe and Volkswagen, as well as technology, oil, energy and public transport companies, and the majority of German car manufacturers are participating in the ground-breaking project for the future. Since 2008, the CEP has also received funding from Germany's National Hydrogen and Fuel Cell Technology Innovation Programme (NIP). The partnership has now covered a distance of 837,000 km using hydrogen - nearly 21 times around the world. In the field of hydrogen technology, the CEP is the biggest demonstration project in Europe.

The Clean Tech Media Award will be presented at a gala evening at Tempelhof Airport where around 1,000 guests from politics, business, science, culture and the media are expected.
